SUMMARY

I am a Java Full Stack Developer with nearly 2 years of experience building scalable enterprise web applications using Java, Spring Boot, React.js, REST APIs, and MongoDB. I have collaborated with cross-functional Agile teams to develop secure, high-performance software, optimize application performance, and deliver responsive user experiences while following software engineering best practices. I bring strong analytical skills, a passion for clean and maintainable code, and the ability to quickly learn new technologies to help organizations deliver reliable and innovative digital solutions.

CORE SKILLS

- **Languages: Java, JavaScript (ES6+), TypeScript, HTML5, CSS3, Python**
- **Frameworks: Spring Boot, React.js, Node.js, Express.js, Angular**
- **Backend: REST APIs, Microservices, WebSocket, JWT Authentication**
- **Databases: MongoDB, MySQL**
- **Tools: Git, GitHub, Jira, Postman, MySQL Workbench**
- **Practices: Agile/Scrum, Code Reviews, Secure Coding, Unit Testing, Performance Optimization**

EXPERIENCE

Software Developer | Trinade AI Technologies Pvt. Ltd. | Oct 2024 – Present

- Designed and developed scalable full-stack enterprise applications using Java, Spring Boot, React.js, Node.js, and MongoDB, improving maintainability and user experience.
- Developed REST APIs and integrated frontend components with backend services to deliver secure, high-performance applications.
- Collaborated with cross-functional Agile teams to deliver software aligned with business requirements and project timelines.
- Participated in code reviews, debugging, performance optimization, and sprint planning.
- Applied secure coding practices and authentication mechanisms to strengthen application security.
- Integrated Razorpay payment gateway and real-time communication APIs.

Project: FlyHigh – Expert Consultation Platform

- Built a real-time consultation platform using Java, Spring Boot, React.js, MongoDB, WebRTC, and WebSocket.
- Implemented REST APIs for authentication, scheduling, payments, and expert management.
- Developed responsive dashboards with secure authentication and role-based access.
- Designed MongoDB TTL-based automatic data cleanup.
- Implemented real-time video calling and notifications.

Project: Company Portfolio Website

- Developed a **modern, responsive portfolio website** showcasing company services, solutions, and projects.
- Implemented **dynamic content rendering** and optimized SEO for better search engine visibility.
- Built **custom components and animations** in React.js for an engaging user experience.
- Ensured smooth **deployment and version control** using Git/GitHub.

EDUCATION

Bachelor in Electronics & Telecommunication Engineering 2019 - 2023 Dr. D. Y. Patil college of Engineering Pune

PROJECTS

Project: Blood-Bank App.

- Developed a dynamic Blood Bank Management
- Application that leveraged the full stack technology
- stack to efficiently manage and coordinate blood
- donation activities. By implementing a user-centric
- approach, I successfully created a seamless and user-
- friendly experience, demonstrating my proficiency in
- both frontend and backend technologies

MERN Stack CRUD Operation (to-do Application)

I developed a dynamic web application using the MERN (MongoDB, Express.js, React, Node.js) stack, implementing comprehensive CRUD operations to manage and interact with a database-driven system.
